

Army Readiness Assessment Program (ARAP)
Mr. Joseph Wells

Why ARAP?

- ARAP is designed to assess unit climate and culture.
- A leading indicator to identify the probability of a mishaps.
- Provides a means to direct resources to mitigate mishaps.
- Proactive leaders receive the best results.
- Immediate feedback from the entire command.

Survey results are influenced by current unit conditions (deployment status, resources, etc).

Communicates the Army's strong conviction that CRM is best.

Civilians take a modified version of the same survey.

Note: Insure to pass the assessment code you receive to personnel within the organization taking the ARAP Assessment

Army Readiness Assessment Program

ARAP Overview

ARAP is a Web-based initiative that provides battalion-level commanders with data on their formation's readiness posture through five segments:

- Process Auditing** - Assesses the processes used to identify hazards and correct problems
- Reward Systems** - Assesses the unit's program of rewards and discipline to reinforce proper behavior and correct risky actions
- Quality Control** - Places emphasis on high standards of performance
- Risk Management** - Assesses the health of unit processes
- Command and Control** - Assesses leadership, communication, and policies as they relate to Composite Risk Management (CRM)

Designed for use by battalion-sized units, the program asks several questions of battalion commanders.

- Wouldn't you like to know if your unit is about to experience a mishap?
- Wouldn't you like to prevent the loss of personnel and equipment?
- Don't you want to protect your combat power?

Following the survey administration (the assessment phase), the commander receives one-on-one feedback on key issues regarding command climate, safety culture, resource availability, workload, estimated success of certain safety intervention programs, and other factors relating to their unit's overall readiness.

So, what's in it for me?

Recommendations

Note: Insure to pass the assessment code you receive to personnel within the organization taking the ARAP Assessment

Top-down emphasis to maximize unit participation; Underscore value of ARAP as part of CRM

Engage O-6 leaders (they receive back-briefs from BN CDRS and approve BN Cdr action plan to address issues)

Track subordinate unit completion; emphasize timely completion (30-45 days) to ensure battalions get current/relevant data

Reinforce necessity for commanders' back-brief to their higher, troops/participants.

Chain Of Command

- ARAP is a web-based assessment tool.
 - Cost- free with 24/7 global access
 - Degree of difficulty- easy
- Initial guidance put out by the CSA...All battalion level units would register their units within 90 days of assumption of command.
- Leading Indicators: Survey results are broken down into safety related categories that impact unit readiness.
- Benefits:
 - Provides battalion-level commanders immediate feedback regarding the safety climate and culture of their organizations.
 - ARAP captures insight on how individuals perceive issues impacting ground, driving and air operations.
 - Assist in identifying behavior toward safety.
 - Shared best practices and courses of actions.
